

DOMINION SERIES™ DS-V11

Cardioid, Dynamic . . .

"A Unique Neodymium Dynamic Microphone,
That Sounds Like A Studio Condenser, Yet Is Remarkably Stable On Stage"

The Dominion Series microphone and accessory products are made with the institutional, commercial and touring applications environments in mind. Houses of worship, courthouses, schools, sound stages and other similar facilities require special considerations during the product development phase, such as multiple end-user requirements, frequent use and storage, safety, and operational performance optimized for the public address functions. Equation Audio not only considers where these products are going, but remains ever mindful of the related budgets.

The DS-V11 exhibits an extraordinary ability to reproduce detail and transient signal artifacts, a great characteristic generally attributed to condenser microphones, and very similar to its sibling, the DS-V10. This powerful Neodymium dynamic cardioid mike also features a highly effective shock isolation system, proprietary to Equation Audio.

In addition, the relatively large diameter capsule achieves a studio quality frequency response, enhanced by a polymer tuning chamber, carefully fitted to the isolation device, thus providing such exceptional enunciation and clarity.

Unlike most cardioid microphones, and inspite of its phenomenal sonic signature, the DS-V11 has great side to side discretion and front to back rejection, along with relatively high SPL capability, allowing the extraordinary sound quality and response to be used on the biggest and loudest stages in the world.

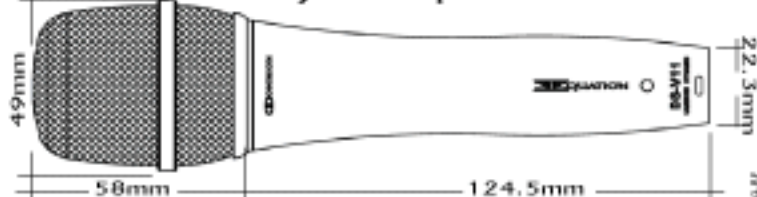

The NEXUS Continues . .

Why is the Dominion Series DS-V11 a 'Nexus'?
Because It's Most Likely The Best Sounding & Performing
Stage Mic Under \$500.00 Available!

Because you won't find a higher quality, better performing cardioid dynamic microphone anywhere else under any other brand name that could possibly deliver this much quality and performance for the same or less cost!

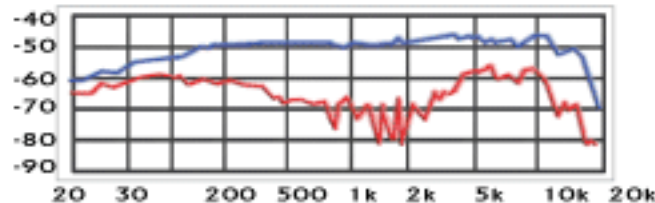

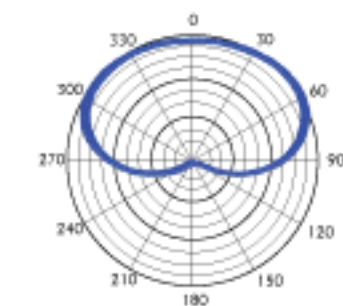

Take advantage of this rare and unique convergence of advanced design engineering and efficient production and join the growing number of end-users who understand the original Equation slogan and part of our permanent mission statement . .

. . 'Beyond Equal'

Specifications: Uni-Directional Dynamic

SENSITIVITY:	-71 dB \pm 3dB	Body Material:	Zinc
IMPEDANCE:	600 OHM \pm 30%	Screen Material:	Steel
FREQUENCY RESPONSE:	20Hz - 18kHz*	Magnetics:	Neodymium
SPL:	140dB	Connector:	XLR
*Rated at + 5dB, - 8dB (20Hz-20kHz)		Net Weight:	310g/11 oz.
