

JM27 Pac

Small Diaphragm Condenser Bundle

Sooner or later, every engineer needs to record in stereo. The JM27 Pac is perfect for most stereo applications, and is an excellent balance of quality and value. (including shock mounts and stereo T Bar).

Features

- Factory Matched Pair of JM27's
- Fixed Cardioid Pattern
- Stereo T Bar
- Heavy Duty Elastic Suspension (2)
- Foam Lined Transit Case

See individual product listings for detailed specifications

TP37 Trak Pak

Recording Bundle

The perfect set-up for the mobile recording enthusiast, the Trak Pak has everything you need to record on the road (or at home on your desktop).

Features

- JM37 Large Diaphragm Condenser Mic
- threeQ Desktop Channel
- Power Supply
- Elastic Suspension (Rigid Mount optional)
- Road Case

See individual product listings for detailed specifications
Features & Specifications subject to change without notice

TP47 Trak Pak

Recording Bundle

The Trak Pak has everything you need to make high quality recordings on the road or at home... all at an affordable price!

Features

- JM47 Large Diaphragm Condenser Mic
- threeQ Desktop Channel
- Power Supply
- Elastic Suspension (Rigid Mount optional)
- Road Case

See individual product listings for detailed specifications
Features & Specifications subject to change without notice

JM27

Small Diaphragm Condenser

The JM27 is a small diaphragm condenser microphone with a fixed Cardioid pattern. Building on the tradition of classic studio microphones, we combined an FET pre-amplifier with transformer-balanced output resulting in a low noise, high SPL mic.

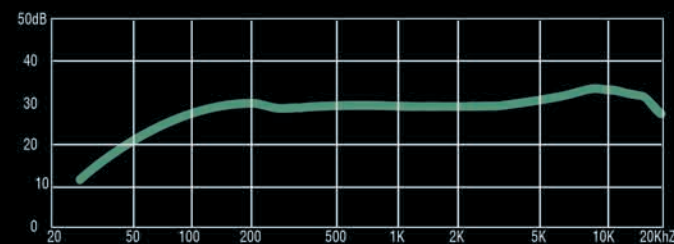

Features

- Fixed Cardioid Pattern
- FET Preamplifier
- Transformer Balanced Output
- Micro-fine Mylar Diaphragm
- Classic "Concentric Electrode" Design
- Rigid Mount (Elastic Suspension optional)

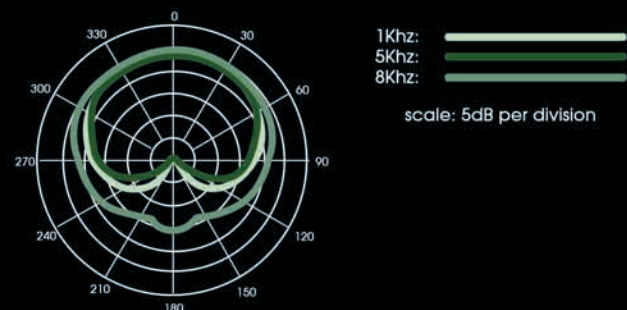

Specifications

Dimensions:	137 X 22 (mm)
Frequency Response:	30Hz - 20kHz
Sensitivity:	10mV/Pa-40+/-2dB (0dB= 1 V/Pa 1000Hz)
Polar Pattern:	Cardioid Diversity> 12dB (300-3000Hz) b Diversity> 15dB (1000Hz)
Impedance:	200 ohms
Equivalent Noise Level:	18dB (A Weighted)
Maximum SPL (for .5% THD @1000Hz):	130dB
Weight:	135g

JM37

Compact Large Diaphragm Condenser

The JM37 is a high quality, large diaphragm condenser microphone with a fixed Cardioid pattern. We chose FET devices for both preamplifier and output stages, resulting in a mic that exhibits very pleasing audio qualities.

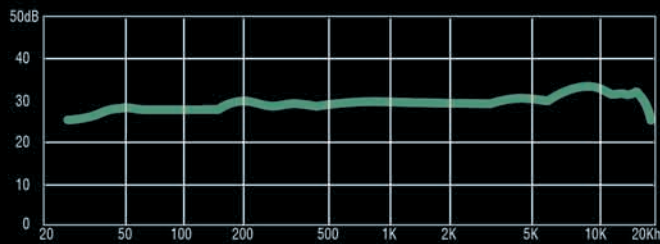

Features

- Fixed Cardioid Pattern
- FET Preamplifier & Output Stages
- Machined Brass Body
- Large, 1.035" Gold Sputtered Diaphragm
- Classic "Concentric Electrode" Design
- Includes Rigid Mount (Elastic Suspension optional)

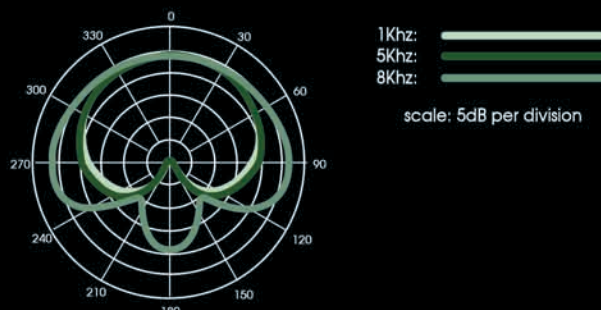

Specifications

Dimensions:	137 X 22 (mm)
Frequency Response:	Substantially flat 25Hz - 20kHz
Sensitivity:	16mV/Pa-40+/-2dB (0dB= 1 V/Pa 1000Hz)
Polar Pattern:	Cardioid Diversity> 12dB (300-3000Hz) b Diversity> 15dB (1000Hz)
Impedance:	200 ohms
Signal to Noise Level:	74dB
Dynamic Range:	126dB
Weight:	460g

JM47a

Large Diaphragm Condenser

The JM47a is a high quality large diaphragm condenser microphone with Cardioid pattern. By using an FET device for the preamplifier circuit combined with a transformer-balanced output, we built a microphone that's destined to be an instant classic.

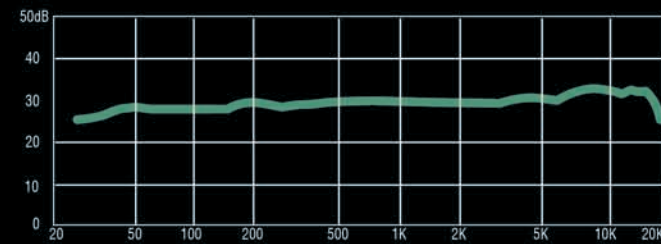

Features

- Fixed Cardioid Pattern
- FET Preamplifier
- Transformer Balanced Output
- High Pass Filter & -10dB Pad
- Large, 1" Gold Sputtered Diaphragm
- Includes Rigid Mount (Elastic Suspension optional)

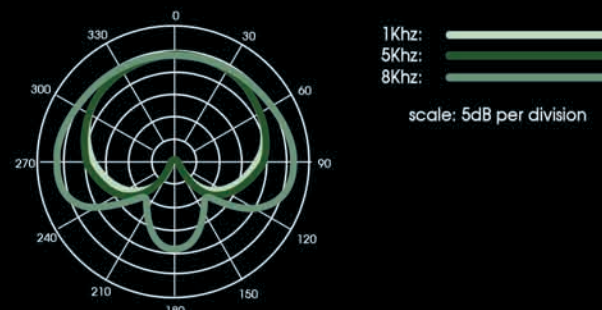

Specifications

Dimensions:	137 X 22 (mm)
Frequency Response:	Substantially flat 20Hz - 20kHz
Sensitivity:	approximately -36dBV
Polar Pattern:	Cardioid Diversity> 12dB (300-3000Hz) b Diversity> 15dB (1000Hz)
Impedance:	200 ohms
Signal to Noise Level:	74dB
Dynamic Range:	126dB
Weight:	460g

JM37-DP

Compact Dual Pattern Condenser

The JM37-DP is a high quality, large diaphragm condenser microphone with Cardioid and Omni patterns. By utilizing FET devices for both preamplifier and output stages, we created a transducer that's destined to be your 'go-to' mic.

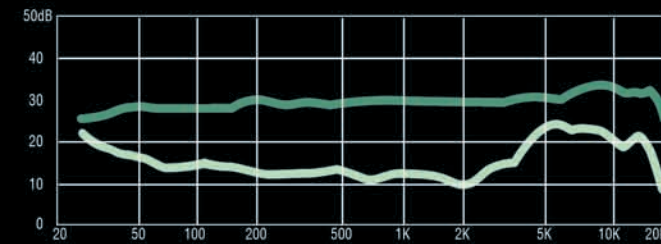

Features

- Cardioid & Omni Patterns
- FET Preamplifier & Output Stages
- Machined Brass Body
- Large, 1.035" Gold Sputtered Diaphragm
- Classic "Concentric Electrode" Design
- Includes Rigid Mount (Elastic Suspension optional)

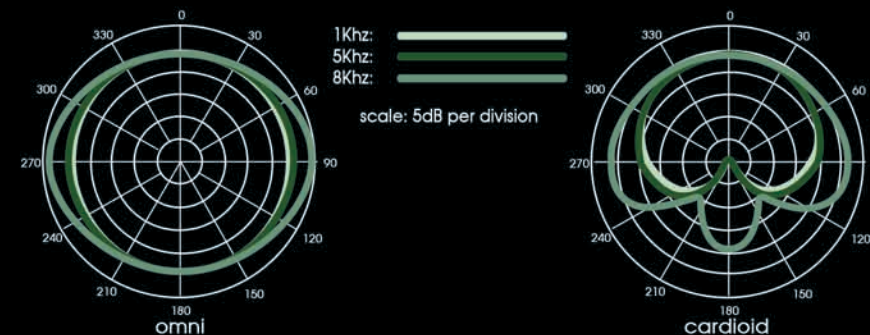

Specifications

Dimensions:	137 X 22 (mm)
Frequency Response:	Substantially flat 25Hz - 20kHz
Sensitivity:	16mV/Pa-40+/-2dB (0dB= 1 V/Pa 1000Hz)
Polar Pattern:	Cardioid Diversity> 12dB (300-3000Hz) b Diversity> 15dB (1000Hz)
Impedance:	200 ohms
Signal to Noise Level:	74dB
Dynamic Range:	126dB
Weight:	460g
