

SE Icis

Cardioid Tube Condenser

\$749 SRP

Key Features:

- Special edge mount diaphragm
- Futuristic design
- Fixed cardioid polar pattern
- Double thick wind screen
- 12AX7 Dual triode vacuum tube

Includes:

- Custom designed shock mount
- Deluxe aluminum flight case
- Wooden display box
- High quality 8-pin army cable
- Power supply unit

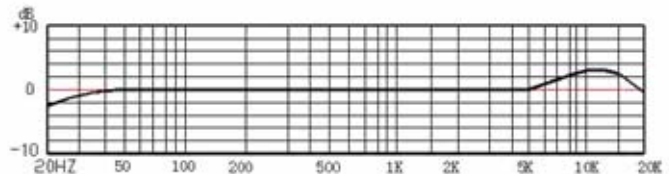

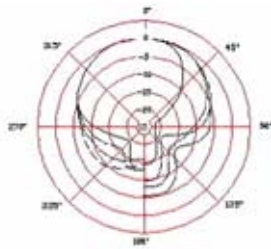

The **SE Electronics ICIS** offers beautiful looks, great design, and exceptional sound at an incredible price. Everything about the ICIS is designed to capture the heart and warmth of a performance, while maintaining a truly detailed vocal take. It features our exclusive 1.07" hand crafted edge-mount diaphragm. The ICIS tube microphone may just be the most important mic in your studio.

Recommended for: Female and rock tenor vocals, saxophone, electric guitar.

"Vocal recording revealed a larger-than-life sound with a physical quality that only decent valve mics seem to pull off."

Huw Price, *Music Tech Magazine*

Technical Specifications

Acoustical operating principle	Pressure gradient transducer	Sensitivity	14.1 mV/Pa - 37 ± 1dB(OdB=1V/Pa 1000Hz)
Polar pattern	Cardioid	Rated impedance	≤ 200 Ohms
Diaphragm	Edge mount 1.07" gold sputtered	Equivalent noise level	16dB (A-weighted)
Frequency response	20Hz-20KHz	Power source	External power supply
Max SPL	135 dB for THD 0.5%	Output Connector	8-pin army cable
