

RT1 Ribbon Tube

Ribbon Tube Condenser

\$1499 SRP

Key Features:

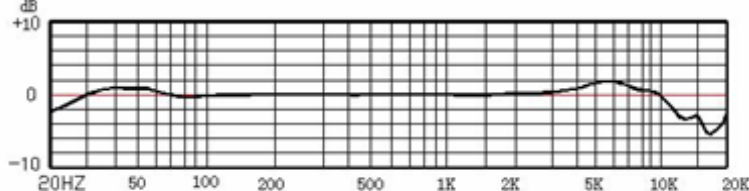

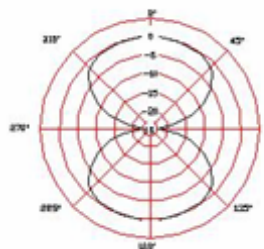

- Classic ribbon sound with the warmth and output of a true tube condenser
- 1.8 micron pure aluminum ribbon element
- Large ribbon geometry design
- Rare earth neodymium magnet
- VOX - *Velocity Optimized Extension* for superior sensitivity and output
- ECC83A tube preamp

Includes:

- Custom designed shock mount
- Deluxe aluminum flight case
- High quality 8-pin army cable
- Power supply unit
- Warranty includes 3 ribbon replacements

The **SE Electronics RT1 Ribbon Tube** builds upon the design of our acclaimed R1 Ribbon microphone. It is a true tube condenser, combining the warmth, detail and output of an ECC83A tube preamp with the smooth, classic sound of our 1.8 micron aluminum membrane. Reach for the RT1 for applications you previously thought not possible with a traditional ribbon microphone. You'll be amazed by the enhanced detail and clarity without the over-extension of your preamp.

Recommended for: Electric Guitar, Drum Overheads, Brass, Vocals, Horn Sections, Woodwinds, String Sections, Broadcast/Voice Over.

Technical Specifications

Acoustical Operating Principle...Electrodynamic pressure gradient
Polar pattern.....Figure-8
Transducer Element.....1.8-Micron aluminum ribbon
Frequency response..... 20Hz-15KHz +/- 3dB

Sensitivity..... 5 mV/Pa @ 1kHz into 1K ohm
Rated impedance..... ≤ 300 Ohms
Magnets.....Rare Earth Neodymium
Power source.....External PSU
Output Connector.....8-pin army cable
