

SE2200A

Class A Cardioid Condenser

\$399 SRP

Key Features:

- 1" Gold sputtered diaphragm
- 100Hz roll off and 10dB pad switches
- Cardioid polar pattern
- Multiple studio applications

Includes:

- Shock mount cradle
- Deluxe aluminum flight case

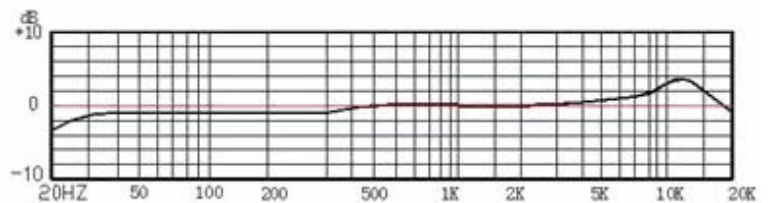

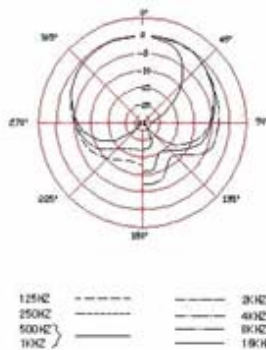

The **sE Electronics SE2200A** studio condenser microphone utilizes a hand crafted, gold sputtered 1.0" diaphragm with class A electronics, offering very low self noise. The SE2200A has received an abundance of rave reviews since its release from Future Music, Music Tech, Sound on Sound, and other popular publications. It has won the MIA "Mic of the Year" award for multiple years!

Recommended for: Great "all-around" mic, broadcast and voice over, percussion, toms, vocals, piano, acoustic and electric guitar

"I tried it with a very broad range of stuff from vocals (male and female) to acoustic guitar, piano and various types of percussion and it delivered clean, crisp results every time. It has an open, lively and most pleasing tone and performs very well right across the frequency spectrum, and it should serve you very well, regardless of the scale and sophistication of your studio."

Dan Duffell, *Future Music Magazine*

Technical Specifications

Acoustical operating principlePressure gradient transducer	Sensitivity14.1 mV/Pa - 37 ± 1dB(0dB=1V/Pa 1000Hz)
Polar patternCardioid	Rated impedance ≤ 150 Ohms
Diaphragm1" Gold sputtered	Equivalent noise level 17dB (A-weighted)
Frequency response 20Hz-20KHz	Power source48V±4V Phantom
Max SPL 130 dB for THD 0.5%	Output Connector3-Pin XLR
